

Maximize Your Impact with The Chicago Community Trust

THE CHICAGO
COMMUNITY TRUST
EQUITY • OPPORTUNITY • PROSPERITY

Want to grow the philanthropic impact of your donor advised fund?

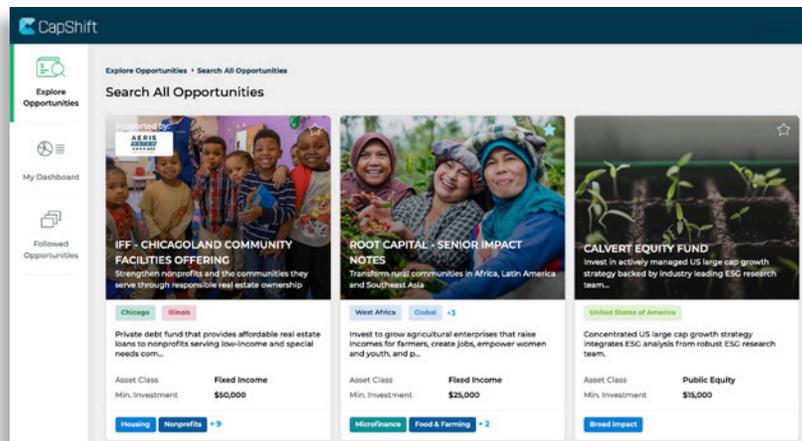

The Chicago Community Trust has partnered with CapShift, an industry-leading impact investing platform, to help you multiply your impact. By recommending impact investments from your donor advised fund prior to making grants, you can generate a positive, measurable social return alongside the financial return.

Here's how it works.

Reach out to your philanthropic advisor at the Trust or [register here](#) to gain access to a cost effective and easy-to-use platform of impact investing opportunities. You and your philanthropic advisor can review these opportunities alongside your philanthropic goals and identify the investments that align with your giving objectives. Then, once you've recommended an investment, it will be included as an asset on your Fund Statement and CapShift will send you regular reporting on both your financial and philanthropic impact.

Your capital can help build a stronger Chicago and world.

Investment opportunities at the Trust are focused on providing non-traditional access to capital in order to build social and economic resiliency and mobility in underserved areas of Chicago, as well as bridge capital for agricultural enterprises in developing economies.

I'm interested! How do I get started?

Reach out to your philanthropic advisor at the Trust or [fill out the online form](#) to gain access to the CapShift platform, which will allow you to easily review and recommend investments.

CapShift is an impact investing platform whose mission is to put philanthropic capital to work for communities and the planet. We do this by providing rigorously researched, easy to access, and cost-effective impact investing opportunities to donor advised fund holders, family offices, and foundations. You can find more information about us at www.capshift.com.

The Chicago Community Trust will not share any current client data with CapShift without your explicit permission. Data from your usage of the platform will never be shared outside of CapShift and the Trust.
